PERSONAL PROJECTS

Online Food Delivery

- <https://tpnrajput.github.io/DE-Online-food-delivery/>
- Online Food delivery is the ongoing team project.
- It is a process in which one can order various foods and beverages from some local restaurant and hotels.
- The order is delivered to the described location.
- It is the ongoing project and technologies used in Online Food delivery System is HTML, CSS and JS for the front-end work.

Weather - API

- <https://tpnrajput.github.io/weather-API/>
- The project is about APIs to retrieve weather data for all cities and countries.
- The entire HTML code for weather app is to obtain user input and it will display the weather data inside the div element.
- With the use of CSS styling the related background image change every time when user input different locations.
- Weather - API also need a API key to indentify the athenticate user and that sends the weather data in the JSON format.

Portfolio

- <https://tpnrajput.github.io/Portfolio/>
- The portfolio is about the online collection of my web dev projects that accurately represent my skills, my abilities and the quality of my work.
- In my portfolio there are various six projects that showcase my technical skills.
